EDUCATION

University of Cincinnati, Carl H. Lindner College of Business

Cincinnati, Ohio

Master of Science, Business Analytics

May 2026

- GPA: 4.0

Transylvania University

Lexington, Kentucky

Bachelor of Arts, Mathematics

May 2024

- GPA: 4.0

ACADEMIC PROJECTS

Summer Undergraduate Research Experience, Transylvania University

May 2023- August 2023

- Developed models to simulate information spread on online networks and determine factors with the most influence
- Worked in R to create a probabilistic model, a graph-based algorithm, and a deterministic differential equation model and compared results, while also considering assumptions and limitations for each model

WORK EXPERIENCE

Graduate Assistant, University of Cincinnati Center for Business Analytics

August 2025- May 2026

- Sport Data Engineering Project | Spring 2026
 - Collaborate with the UC Football Sport Science department to create a centralized framework for monitoring and analyzing athlete health and performance data
 - Design preliminary data model to organize and unify data sources
 - Ingest data into Snowflake from a variety of sources, including Catapult and Thermohuman
- Natural Language Processing Project | Fall 2025
 - Collaborated with stakeholders from HBH Holdings, a CBA member company, to develop a tool to streamline the spec review process
 - Developed a RAG pipeline and UI to answer user-specific questions about confidential documents
 - Presented results and gave a prototype demo to the HBH team, including multiple C-suite executives

Data Science Intern

June 2024- June 2025

Infineon Technologies

Lexington, Kentucky

- Prepared data for future use by performing exploratory analysis and manipulation
- Developed mathematical and machine learning models and translated results into business decisions
- Created intuitive Tableau dashboards to visualize data in a way that is attractive to audiences
- Communicated findings to company stakeholders and other non-technical colleagues in a clear and concise manner

E.L.F. Fellow

April 2022- May 2024

Transylvania University Academic Center for Excellence

Lexington, Kentucky

- Organized and led forum meetings twice per week to provide extra assistance on more difficult concepts for students in Functions and Calculus classes
- Communicated with faculty members to determine the topic for each week's forum
- Created lesson plans that reviewed content from class and allowed students to engage with the material in a new way
- Fostered a sense of community among students to encourage active participation and shared learning

Mathematics Drop-In Tutor

September 2021- May 2024

Transylvania University Academic Center for Excellence

Lexington, Kentucky

- Conducted individual and group tutoring sessions for students in a variety of different math courses
- Facilitated students' learning by re-emphasizing important concepts and assisting with practice problems

TECHNICAL SKILLS

- Proficiency in Python, R, SQL, Tableau, and Snowflake
- Experienced with machine learning, statistical analysis, natural language processing, and data engineering
